

How Can a Vehicle Service Contract Help You?

Purchasing a vehicle is a big financial decision. A Vehicle Service Contract may offer an option to help manage unexpected repair costs that may impact your budget.

Regardless of the protection plan you choose, we deliver thorough coverage options covering a wide range of vehicle parts and systems. After all, you never know what might happen or go wrong with your vehicle—and peace of mind is priceless.

Coverage Options

Exclusionary Coverage Programs

Our comprehensive plans cover the most repairs making it is easier for us to list the items in the contract that are not covered.

Certified & Comprehensive Wrap Coverages

Factory warranties are often limited to covering major components. Our plans provide added protection by “wrapping around” many of the repairs covered by the factory. It may also include extended coverage for your engine, transmission and drivetrain assembly after the factory coverage expires.

High Mileage Programs

Our High Mileage Vehicle Service Contracts are designed to cover certain repairs no longer provided by the factory warranty. Because no matter how well you maintain your vehicle, over time your vehicle will likely need repairs.

Ask a dealership representative whether a Vehicle Service Contract (VSC) could be a good option for your vehicle!

Coverage Exclusions May Apply*

- Mechanical breakdowns covered by manufacturer warranty
- Lack of maintenance or pre-existing conditions
- Wear and tear items (e.g. windshield wipers, brakes, battery, etc.)
- Aftermarket accessories or equipment
- Repairs or damage caused by an accident
- Normal maintenance services and related parts

Maintenance Requirements

You are required to maintain your vehicle in accordance with the contract provisions. You are required to retain copies of all maintenance receipts during the term of the contract. Exclusions and limitations apply.
